I started my HTML with an introduction of my favourite movie using <h1> </h1>.

Next I used the "img" tag to insert the photo of the movie poster using a link from an image from google images.

Then I put the name of the movie in <h2> </h2>.

Then in the <p> tag I wrote a short description of the movie.

Then using <section> <p> and
 I wrote a list of the cast members.

I added another picture of a cat from the movie with a progress ID tag to 100% to show that the movie is 100% cats!

I added a tag on the bottom with my name and the date.
